About Me

Result oriented and organised software engineer having 5+ years experience of working productively in a dynamic environment. Experienced in crafting large scale applications with both monolithic and microservices architecture and have extensive hands on experience in Javascript, Typescript and .NET tech stack specifically Angular and Node.

Professional Experience

Airlift Technologies | Senior Software Engineer
Sept 2021 – Present

- Proactively plan and strategise with the team on possible issues and suggest workable alternatives.
- Support and coordinate technical and business aspects of software development activities, including requirement analysis, system design, implementation of applications and scalability.
- Train and mentor junior engineers, sharing knowledge and working to improve overall team performance.
- Participate in recruiting best technical talent for the team

10Pearls | Staff Software Engineer
Feb 2018 – Sept 2021

- I joined 10pearls as a Software Engineer and promoted to Senior and then Staff Software Engineer in a span of 3.8 years.
- Worked with development and testing team members to design and develop robust solutions to meet client requirements for functionality, scalability and performance.
- Acts as a point of contact for technical issues for specific work streams across multiple projects.
- Collaborated with clients to define solution requirements.
- Mentored the other technical staff, assists them where needed, and leads the effort in resolving technical challenges.
- Guided and participated in recruiting the best technical talent for the team.

Digital Dividend | Software Engineer
May 2017 – Feb 2018

- I joined as Jr. Software Engineer and promoted to Software Engineer.
- Developed Xamarin App, Web App and Web APIs.
- Responsible for designing application architecture and databases with team coordination.
- Participated in deployment activities.
- Troubleshooted application issues.

NextGeneSol | Internee
Feb 2017 – March 2017

- Developed REST APIs and Web App for multiple clients.
- Designed application database and updating releases with team coordination.
- Resolved production application issues.
